

## PROFILE

My name is Jaivin Barot. I am from Gujarat and I'm 20 years old. I am a passionate developer who enjoys creating logic, working on the backend, and solving challenging issues. With my problem-solving abilities, I would be an addition to whatever project I work on.

## EDUCATION

### Diploma in Computer Engineering 2018 - 2021

Completed my diploma from Government Polytechnic Ahmedabad with 9.67 CGPA.

### B.E in Computer Engineering 2021 - Current

Currently, I am pursuing B.E. from LDRP-ITR Gandhinagar. My SPI is 7.61 until the 5th semester.

## PROJECTS

### Food Compare

Food compare is a website that allows users to compare food prices from multiple platforms like swiggy, zomato, etc. In real time. Users can search for food items by name, cuisine, or location, and then compare the prices of the same item from different platforms. Food compare also provides users with reviews and ratings of food items from other users.

### Purity AI

"PurityAI" allows users to block NSFW content from images, text, audio, and video from the internet using a Chrome extension, plus we also have AI powered image processing tools like Image Upscaler, Text to Image generator, Image Background Remover, etc.

### Xenesis-Website

My team and I created the "Xenesis" website for our college's tech fest. We created an online ticketing system for several tech-fest events.

### Procom

Procom is a product comparison website that allows users to compare products from any domain. Users can search for products by category, brand, or price, and then compare the features and specifications of different products. Procom also provides users with reviews and ratings of products from other users.

## SKILLS
